- Apollo

Statement

I am a Software Engineer with a keen attention to detail, and an ever growing thirst for knowledge in all things Computers. I come with skill in front and backend development and look forward to have success with a great team.

Experience

General Assembly 2020-2021
Developed and tested full-stack applications with over 500+ hours of hands on experience.

-Built secure and responsive applications by following MVC patterns and using tools like postman.

-Modeled and Stored data in SQL & NoSQL databases using Node, Express, Python, and Django.

-Safely developed and stored applications using version control on Git and Github.

-Computer science fundamentals as well as best practices for software engineers.

-Collaborated with a diverse team to build full-stack applications

Media, Communications Specialist, Justin Hunt Media — 2016-Present
Been in charge of overseeing all internal and external communications for clients, ensuring its message is consistent and engaging. Also creating and preparing detailed media reports, relaying press releases with personal statements, and preparing marketing material.

Education

General Assembly - Software engineering

Mt San Jacinto Community College - General Education

Skills

Front end engineering - HTML, CSS, Javascript, React, and Next.js.

Back end engineering - Making stable and reliable servers with REST, or GraphQL to handle CDNs or ORM with SQL or NoSQL
